THREE COUNTIES
BORDERS GROUP

Great are the works of the Lord, studied by all who delight in them - Ps 111:2

Science and Faith

Encouraging informed discussion on science and Christian faith issues

God and the Brain: What Neuroscience Can Teach Us

Rev Prof Alasdair Coles

Professor Coles is a neurologist at Addenbrooke's Hospital, Cambridge, where his primary interest is in the immunology and treatment of Multiple Sclerosis. He was ordained in 2009. Alasdair will talk about how our brains experience God. Is faith and religious experience more than just a series of electrical events? Do we have a special 'God-spot' that allows us to communicate with Him? What are the implications of observations from people with neurological disease? What does brain imaging show us?

Tuesday 17th October 2017, High Cross Church, Camberley

FREE Admission. Assemble from 7.00pm

Illustrated talk begins at 7.30 pm followed by Q&A and refreshments

For details contact secretary@science-faith-issues.org or Dr John Russell at chynoweth.jw@gmail.com, phone 01276 66565.
