

Science and Christian Faith

Encouraging informed discussion on science-faith issues and concern for the environment

**Tuesday 28th February 2017, St Peter's Church,
Farnborough, GU14 7AP**

**Assemble from 7.00pm. Illustrated talk commences at 7.30 pm
followed by discussion and refreshments**

Nanoscience: a new aspect of God's creation

Russell Cowburn FRS is Professor of Experimental Physics, Cavendish Laboratory, University of Cambridge., where he leads a large research team studying the physics and applications of nanotechnology. He is a committed Christian and frequently gives lectures on science and faith.

In this talk he describes what nanotechnology is, how it might be used to help solve global problems such as climate change and how we might begin to answer questions such as 'what does God think about nanotechnology?'

EVERYONE WITH AN INTEREST IN SCIENCE AND FAITH IS WELCOME

Admission is FREE. Further details contact secretary@science-faith-issues.org,
or Dr John Russell at chynoweth.jw@gmail.com, telephone 01276 66565
